SUMMARY

Java Full Stack Developer with nearly 1 year of professional experience in developing and maintaining web applications using Java, Spring Boot, Hibernate, REST APIs, HTML, CSS, JavaScript, Thymeleaf, AJAX, and OracleDB. Experienced in RESTful API development, CRUD operations, SQL queries, database integration, application debugging, API testing, and application maintenance. Currently developing a microservices-based application using Spring Boot with OracleDB, MySQL, and MongoDB. Familiar with Swagger and basic Burp Suite for API documentation and testing. Proficient in Git, Maven, Postman, and Linux.

EXPERIENCE

Software Developer – Java Full Stack Developer
National Informatics Centre (NIC)

Sep 2025 – Present
Bangalore, India

- Developed and maintained web applications using Java, Spring Boot, Spring MVC, OracleDB, Thymeleaf, HTML, CSS, JavaScript, and AJAX.
- Designed and developed RESTful APIs and CRUD operations using Spring Boot, Hibernate, Spring Data JPA, and Java.
- Developed and optimized Oracle SQL queries for data retrieval, data manipulation, and application performance improvement.
- Implemented database integration using JPA and Hibernate for efficient persistence and retrieval of application data.
- Investigated, debugged, and resolved application issues to improve system reliability, functionality, and performance.
- Tested REST APIs using Postman and performed API validation and troubleshooting during development.
- Used Git for version control, Maven for dependency and build management, and Linux for application deployment and maintenance.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL

Backend Technologies: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, RESTful APIs

Security: JWT Authentication, Authentication & Authorization

Microservices: Eureka, API Gateway, OpenFeign, Config Server, Resilience4j

Frontend Technologies: HTML5, CSS3, JavaScript, Thymeleaf, AJAX, Angular (Basic)

Databases: OracleDB, MySQL, MongoDB

Testing & API Tools: JUnit 5, Mockito, Postman, Swagger/OpenAPI

DevOps & Tools: Docker, Maven, Git, Linux

Core Concepts: OOP, Data Structures, CRUD Operations, Exception Handling, SQL Optimization, API Integration

PROJECTS

Microservices-Based Application

Java — Spring Boot — Microservices

- Currently developing a microservices-based application using Java and Spring Boot with multiple independent services to support modular, scalable, and maintainable application architecture.
- Developing RESTful APIs for communication between services and implementing CRUD operations using Spring Data JPA and Spring Data MongoDB.

- Integrating OracleDB, MySQL, and MongoDB based on the data requirements of individual microservices.
- Implementing API documentation and testing using Swagger/OpenAPI and Postman for RESTful web services.
- Implementing request validation, exception handling, database integration, and service-level API communication to improve application reliability and maintainability.
- Using Maven for dependency and build management and Git for source code version control.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering *2022 – 2025*
Sethu Institute of Technology

Diploma in Computer Science and Engineering *2019 – 2022*
KLN Polytechnic College

CERTIFICATIONS & TRAINING

- **Java Full Stack Development** – Besant Technologies *Jan 2025 – Jul 2025*
- **Full Stack Development Internship** – NoviTech R&D Pvt. Ltd. *Jul 2024 – Aug 2024*
